# 2023-24 General Instructions for County Financial Transactions Report

## \*\*\* SPECIAL COVID-19 INSTRUCTIONS FOR FTR REPORTING \*\*\*

### Overview

The State Controller's Office would like to capture COVID-19 revenues and expenditures/expenses in the interest of transparency as well as in support of decision-makers. All sources and uses of COVID-19 relief funds received by counties should be separately reported on their respective financial transactions report (FTR). Given the unexpected complexity of so many funding resources, we ask that you separately identify all sources and uses of COVID-19 relief to the best of your ability. The amounts should match what you are reporting in the annual comprehensive financial report (ACFR) for the fiscal year. Examples of funding sources include the *Coronavirus Relief Fund* (CARES Act Title V; Sec 5001), the *Coronavirus State and Local Fiscal Recovery Funds* (ARPA Act Title IX, Sec 9901), *County General Fund COVID-19 Allocations* (realignment backfill), *COVID-19 Federal Disaster Assistance*, *State Allocations for Direct Disaster Response Operations* related to COVID-19, and other COVID-19 grants or programs.

### Specific Instructions

Identify these amounts with "COVID-19", separately stated from other program or funding amounts, while also noting the related funding source or program. All COVID-19 relief funds recognized in the current fiscal year by local government should be recorded according to the direct source of funds. For example, prime recipients of federal Coronavirus Relief Funds should report receipts as federal revenues, while subrecipients of that federal program receiving money directly from the State should report receipts as state revenues.

### Governmental Funds

**Federal COVID-19 Revenues:** Revenues received directly from the federal government should be reported on Form 19 - Intergovernmental - Federal, line R20 - Other Federal - Other (Specify); enter the specific funding source or program on the subform preceded by "COVID-19". For example, "COVID-19 Coronavirus Relief Fund (CARES Act Sec. 5001)".

**State COVID-19 Revenues:** Revenues received from the State should be reported on Form 18 - Intergovernmental - State, line R43 - Other State - Other (Specify); enter the specific funding source or program on the subform preceded by "COVID-19". For example, "COVID-19 State and Community Corrections Planning Grant".

**Other Intergovernmental COVID-19 Revenues:** Any other intergovernmental revenues received but not from the two sources above can be reported on Form 20 - Other In-Lieu Taxes and Intergovernmental – Other, line R05 - Other Intergovernmental – Other (Specify); enter the specific funding source on the subform. Follow the same naming format as prescribed for the subform above.

**Non-governmental COVID-19 Revenues:** Any other revenues received from a non-governmental source can be reported on Form 22 - Miscellaneous Revenues and Total Revenues, line R06 - Other Miscellaneous Revenues (Specify); enter the specific funding source or program on the subform. Follow the same naming format as prescribed for the subform above.

**COVID-19 Expenditures:** Expenditures should be reported on Forms 23 through 28 – Statement of Expenditures-Governmental Funds on the applicable line item. Provide a footnote showing how much is applicable to COVID-19. If a category does not exist, please use the "Other" line that best fits for the expenditure, for example, Other General Government. COVID-19 expenditures should not be reported as extraordinary or special items. Reports submitted to the agencies providing the relief may be used to support the footnote.

### **Enterprise Funds and Internal Service Funds**

**COVID-19 Revenues and Expenses:** COVID-19 recognized revenues and expenses related to COVID-19 emergency relief in enterprise or internal service funds should be included on the appropriate line for "Other" revenues or "Other" expenses in the enterprise fund Forms 04 through 13, or internal service fund Form 3, Statement of Revenues, Expenses, and Changes in Fund Net Position. COVID-19 expenses should not be reported as extraordinary or special items. Report amounts as reflected on the ACFR and provide a footnote showing how much is applicable to COVID-19 relief. Identify the source or program and the applicable amounts. For example, "*COVID-19 Health Care Providers Emergency Relief – Revenues \$800,000; Expenses \$1,659,000*". Reports submitted to the agencies providing the relief may be used to support the footnote.

# 2023-24 General Instructions for County Financial Transactions Report

## Introduction

Pursuant to Government Code section 12463 et seq., the California State Controller's Office (SCO) has developed the *County Financial Transactions Report*. The purpose of the financial transactions report (FTR) is to provide financial data about California counties on a uniform basis.

Government Code section 53891(a) requires counties to furnish the Controller with this financial transactions report. The financial transactions reports are then compiled and published in an "open data" platform by SCO at <https://bythenumbers.sco.ca.gov> for use by the State Legislature, counties, and the public.

California Government Code section 53891(b) requires the Controller to prescribe uniform accounting procedures for counties. This guidance can be found in SCO's Accounting Standards and Procedures for Counties (ASP) manual at SCO's website, [https://www.sco.ca.gov/pubs\\_guides.html](https://www.sco.ca.gov/pubs_guides.html). The SPD manual conforms to Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

In addition, an officer of a local agency who refuses to submit a report, after written notice by SCO to do so, is subject to prosecution by the Attorney General's Office and subsequent forfeiture of:

- One thousand dollars (\$1,000) in the case of a local agency with total revenue, in the prior year, of less than one hundred thousand dollars (\$100,000), as reported in the California State Controller's annual financial reports.
- Two thousand five hundred dollars (\$2,500) in the case of a local agency with total revenue, in the prior year, of at least one hundred thousand dollars (\$100,000) but less than two hundred fifty thousand dollars (\$250,000), as reported in the California State Controller's annual financial reports.
- Five thousand dollars (\$5,000) in the case of a local agency with total revenue, in the prior year, of at least two hundred fifty thousand dollars (\$250,000), as reported in the California State Controller's annual financial reports.

If such an investigation must be made in two successive years, a certified copy of the latter report must be filed with the grand jury of the county in which the agency is located.

# 2023-24 General Instructions for County Financial Transactions Report

## Reporting Instructions

### **Fiscal Year**

The Fiscal Year should be consistent with the fiscal year end, indicating in which annual comprehensive financial report (ACFR) the activity belongs.

### **Current Year / Prior Year**

Extreme fluctuations in values between years should be identified within the footnotes. A tool has been added at the top of the forms to help facilitate comparisons.

### **Required Report Format**

#### **Report Whole Amounts**

Eliminate the cents for amounts by rounding to the nearest dollar.

#### **Unused Paper Forms**

If preparing a paper report, file only the forms used to complete the report.

#### **Negative Amounts**

If preparing a paper report, use minus, “—”, to indicate a reduction or negative amount on a line item.

#### **Prohibited Characters**

Do not use all caps (e.g., ALL CAPS) in a description unless inputting an acronym or initials. Use Initial Caps (e.g., Initial Caps) for all text fields such as names, addresses, and descriptions.

### **Required versus Optional Forms**

In order to prepare a complete report for the county, all forms must be completed if applicable to the county’s activities. The reporting forms are organized in the order in which they should be completed. When submitting a paper report, file only the completed forms.

### **Numbering Sequences in Forms**

Numbering in LGRS Online is identified with an “R” value on the left side of each form (i.e. R1, R2, R2.5, etc.). These values are an internal technical reference, which are not necessarily sequential. They may be used to help assist in identifying lines when speaking with representatives of SCO.

## **Special Instructions**

### **Accounting Basis**

Generally Accepted Accounting Principles (GAAP) require that the modified accrual basis be used for governmental fund types (General Fund, Special Revenue Funds, Debt Service Funds, Capital Projects Funds, and Permanent Funds). The accrual basis is used for proprietary fund types (Enterprise Funds and Internal Service Funds) and fiduciary fund types (Pension and Other Employee Benefit Trust Funds, Investment Trust Funds, Private-Purpose Trust Funds, and Custodial Funds). See Definitions and Terminology for Basis of Accounting descriptions.

### **Activity**

A specific county activity must be reported in only one set of forms: either governmental fund forms, proprietary fund forms, or fiduciary fund forms. When using the Conduit Financing form, report activity in only one fund: either Enterprise Fund or Fiduciary Fund. A specific county activity must not be reported in more than one set of forms.

### **Component Unit Information**

Component units (CUs) are legally separate organizations for which the elected officials of the county are financially accountable. CUs can also be organizations whose relationship with the county is such that exclusion would cause the county's financial statements to be misleading.

#### **Include Blended Component Unit**

Blended component units (BCUs), although legally separate entities, are in substance part of the county's operations. Therefore, financial data from BCUs are integrated into the appropriate county's funds for reporting purposes.

#### **Exclude Discretely Presented Component Unit**

Discretely presented component units (DPCUs) are legally separate from the county and usually provide services to entities and individuals outside the county. Therefore, financial data from DPCUs should be excluded from the FTR.

### **Debt**

#### **Exclusions:**

Except as noted in the instructions for the Long-Term Debt – Bonds and COPs form, the revenue and expenditure/expense activity of the following debts should not be included in this report:

- Street Opening Act of 1889
- Street Opening Act of 1903
- Change of Grade Act of 1903
- Improvement Act of 1911
- Street Opening Bond Act of 1911
- Municipal Improvement Act of 1913
- Tree Planting Act of 1913

## Reporting Instructions (Continued)

Improvement Bond Act of 1915  
Street Improvement Act of 1913  
Street Opening Act of 1921  
Landscaping and Lighting Act of 1943, 1949, and 1972

### Inclusions

The revenue and expenditure/expense activity of the following debts should be included in this report:

Street Lighting Act of 1919  
Maintenance District Act of 1927  
Municipal Lighting Act of 1931  
Vehicle Parking District Laws of 1951

### Dissolved Redevelopment Agencies

#### Assets

Any housing assets transferred to the county as a result of the dissolution of the redevelopment agencies should be reported on the Balance Sheet form and the Noncurrent Assets, Deferred Outflows of Resources, Noncurrent Liabilities, and Deferred Inflows of Resources form (if accounted for in a governmental fund) or on the Statement of Net Position (if accounted for in an enterprise fund).

#### Activities

Any housing activities transferred to the county as a result of the dissolution of the redevelopment agencies should be reported on the Statement of Revenues forms and the Statement of Expenditures forms (if accounted for in a governmental fund) or on the Other Enterprise Fund form as "Housing" (if accounted for in an enterprise fund).

### Interfund Activity

Interfund activity involves financial interactions between county funds, not including discretely presented component units. According to GAAP there are two categories of interfund activity: reciprocal and nonreciprocal. Reciprocal interfund activity consists of interfund loans and interfund services provided and used. Nonreciprocal interfund activity consists of interfund transfers and reimbursements.

#### 1. Interfund Loans

Report interfund loans as an *interfund receivable* in the lending fund and as an *interfund payable* in the borrowing fund. In this internal activity, the asset is not treated as an investment (even if in the form of a promissory note) and the liability is not treated as a debt.

Note: Report interfund loans that are not expected to be repaid as *interfund transfers*.

## 2. Interfund Services Provided and Used

As part of regular programmatic activity, one fund will sell goods or services to another fund. Report interfund services as *due from other funds* and *revenues* in the fund providing the goods or services (seller). Report interfund services as *due to other funds* and *expenditures* or *expenses* in the fund receiving the goods or services (purchaser).

Note: Overhead allocations from the general fund are not considered interfund services provided and used.

## 3. Interfund Transfers

Report interfund transfers, such as operating transfers and interfund loans that are not expected to be repaid, as follows:

- a. Fund making the transfer:
  - Proprietary funds: Transfer Out
  - Governmental funds: Other Financing Sources (Uses) – Transfer Out
- b. Fund receiving the transfer:
  - Proprietary funds: Transfer In
  - Governmental funds: Other Financing Sources (Uses) – Transfer In

Report residual equity transfers and transfers of capital assets as follows (proprietary funds only):

- a. Proprietary fund making the transfer:
  - To governmental funds: Nonoperating Expense – Loss on Disposal of Capital Assets
  - To proprietary funds: Transfer Out
- b. Proprietary fund receiving the transfer:
  - From governmental funds: Increase to Capital Contributions
  - From proprietary funds: Transfer In

## 4. Interfund Reimbursements

One fund may pay for an expenditure or expense and subsequently be repaid by another fund ultimately responsible for the expenditure/expense. Report interfund reimbursements as *due to other funds* and *expenditures* or *expenses* in the reimbursing fund (the fund ultimately responsible). Report interfund reimbursements as *due from other funds* and a *reduction* in *expenditures* or *expenses* in the reimbursed fund (the fund that initially paid).

Note: Overhead allocations are properly treated as reimbursements.

### **Pass-Through Revenues**

Revenues that meet criteria for fiduciary activities (see “Definitions and Terminology” in the instructions), such as grant proceeds or tax collections, that are "passed through" by the county to other governmental agencies and the county is merely a cash conduit should only be reported on the Statement of Fiduciary Net Position form. These amounts should not be reported as the county’s revenues or expenditures in the report when the county has no discretionary control (administrative or direct financial involvement) concerning the use of the pass-through revenue.

### **Pension Trust Funds**

Pension trust fund financial transactions should not be reported in the Statement of Revenues forms and the Statement of Expenditures forms. Any county retirement contributions made in the current year, including contributions to county-administered pension trust funds, should be allocated and reported in the applicable functional categories of the Statement of Expenditures.

### **Revenues, Expenditures, and Expenses**

Use the Statement of Revenues forms and the Statement of Expenditures forms to report the revenues and expenditures of governmental fund types.

Encumbrances are not expenditures and should not be included in the Statement of Expenditures forms. Encumbrances should only be reported on the Balance Sheet form as a restricted, committed, or assigned portion of fund balance.

Use the Internal Service Fund form and the Enterprise Fund forms to report the revenues and expenses of proprietary funds.

The Internal Service Fund form and the Other Enterprise Fund form can be used multiple times to report additional internal service fund and enterprise fund activities, respectively.

## **Definitions and Terminology**

The following definitions set forth the meaning of certain words and phrases as they apply to this report and any rules, regulations, or instructions issued by SCO.

### **Basis of Accounting**

“Basis of accounting” refers to the timing of measurements. Per GASB Codification Section 1600, the modified accrual or accrual basis of accounting, as appropriate, should be used in measuring financial position and operating results in fund financial statements. Governmental fund types should be presented using the modified accrual basis, while proprietary and fiduciary fund types should be presented using the accrual basis. Transfers should be reported in the period in which the interfund receivable or payable arise.

#### **Accrual Basis**

Under the accrual basis of accounting, most transactions are recognized when they occur, regardless of when cash is received or disbursed.

##### **Accrual Basis in Proprietary Fund Statements**

Using the economic resources measurement focus, revenue from exchange transactions generally should be recognized when an exchange, in the ordinary course of operations, is effected.

##### **Accrual Basis in Fiduciary Fund Statements**

Using the economic resources measurement focus, recognition of liabilities should be recognized when the government is compelled to disburse fiduciary resources.

#### **Modified Accrual Basis in Governmental Fund Statements**

Using the current financial resources measurement focus, revenues should be recognized in the accounting period in which they become both measurable and available. Expenditures should be recognized in the accounting period in which the fund liability is incurred, if measurable, except for unmatured interest on general long-term liabilities, which should be recognized when due.

#### **Cash Basis**

Cash basis is generally not used for fund accounting in the FTR forms (see Special Instructions). It may, however, be a legal requirement for specific code sections of law. Under the cash basis of accounting, revenues and transfers in are not recognized until cash is received, and expenditures or expenses (as appropriate) and transfers out are recognized only when cash is disbursed. Cash basis excludes any accrued payables, accrued receivables, or encumbrances.

## Reporting Instructions (Continued)

### **Bonds**

Pursuant to Government Code Section 53892.2 for the purpose of these reports, bonds are defined as follows:

#### **Bonds**

“Bonds” means all bonds, warrants, notes or other evidences of indebtedness or liability for which the reporting local agency is liable for payment of principal and interest thereon.

#### **General Obligation Bonds**

“General obligation bonds” means bonds payable, both principal and interest, from the proceeds of ad valorem taxes or ad valorem assessments which may be levied within the entire territory of the local agency, without limitation as to rate or amount, upon all property subject to taxation or assessment.

#### **Revenue Bonds**

“Revenue bonds” means bonds issued by a local agency payable, both principal and interest, from the revenues of a revenue-producing enterprise.

#### **Improvement District Bonds**

“Improvement district bonds” means bonds payable, both principal and interest, from the proceeds of ad valorem taxes or ad valorem assessments which may be levied within a fixed and defined portion or portions of the local agency, without limitation as to rate or amount, upon all property subject to taxation or assessment.

#### **Limited Obligation Bonds**

“Limited obligation bonds” means any bonds payable, both principal and interest, from any taxes, other than taxes or assessments levied upon property.

#### **Special Assessment Bonds**

“Special assessment bonds” means any bonds issued to represent unpaid assessments upon lands in an area fixed and defined by the local agency, the lands within such area being specially benefited by and assessed or to be assessed to pay the costs and expenses of a public acquisition or improvement.

#### **Nonagency Debt**

Nonagency debts are liabilities of property owners or other external entities and not primary liabilities of the local agency.

### **Debt Forms**

References to “debt forms” apply to the following FTR forms:

1. Long-Term Debt (Bonds and COPs) form
2. Other Long-Term Debt (Loans, Notes, and Other) form
3. Construction Financing (Federal and State) form
4. Lease Obligations (Purchase Agreements) form

## **Encumbrances**

Encumbrances are obligations in the form of purchase orders, contracts, or salary commitments which are chargeable to an appropriation and for which a part of the appropriation is reserved. They cease to be encumbrances when paid or when the actual liability is set up.

## **Expenditures**

If the accounts are kept on the accrual basis, this term designates total charges incurred, whether paid or unpaid, including expenses, provision for retirement of debt not reported as a liability of the fund from which retired, and capital outlays. If they are kept on the cash basis, the term covers only actual disbursements for these purposes.

Note: Encumbrances are not considered expenditures.

## **Fiduciary Activity**

Not all “trusts” are necessarily fiduciary in nature. According to GASB Statement No. 84, an activity is fiduciary if all of these criteria are met:

- (a) The associated assets are controlled by the government,
- (b) The assets are not derived from the government’s own-source revenues, government-mandated nonexchange transactions, or other voluntary nonexchange transactions, other than externally administered/financed pass-through grants, and
- (c) Has certain qualifying characteristics regarding the external administration, derivation of revenues, and protections from creditors, as defined by GAAP.

For further details, see the GASB Codification, Section 1300.128 through 1300.136 for fiduciary activities and Section N50.04 for classes of nonexchange transactions, accessible through the Governmental Accounting Research System (GARS) at GASB.org.

## **Obligations**

Obligations are amounts which the governmental unit may be legally required to pay out of its resources. They include not only actual liabilities but also unliquidated encumbrances.

## **Leases**

Leases are specifically defined in GASB Cod. L20 (GASB Statement No. 87 and subsequent pronouncements). GASB Statement No. 87 eliminated leases being distinguished as either capital or operating leases. Leases that meet criteria for a transfer ownership at the end of the lease are now treated as a financed purchase and recorded as other asset purchases.

Exclusions from GASB Statement No. 87 treatment include leases of one year or less, leases that transfer ownership at the end of the contract, investment leases, or leases of intangible assets, biological assets, inventory, supply contracts, service concession arrangements, or certain assets financed with outstanding conduit debt. (Reference GASB Codification I50.702 Definition and Characteristics of an Investment)

## Reporting Instructions (Continued)

For leases under Statement 87, a lessee government is required to recognize (1) a lease liability and (2) an intangible asset representing the lessee's "right to use" the leased asset. A lessor government is required to recognize (1) a lease receivable and (2) a deferred inflow of resources. A lessor will continue to report the leased asset in its financial statements.

A lessee also will report the following in its financial statements:

- Amortization expense for using the lease asset (similar to depreciation) over the shorter of the term of the lease or the useful life of the underlying asset
- Interest expense on the lease liability
- Note disclosures about the lease, including a general description of the leasing arrangement, the amount of lease assets recognized, and a schedule of future lease payments to be made.

A lessor also will report the following in its financial statements:

- Lease revenue, systematically recognized over the term of the lease, corresponding with the reduction of the deferred inflow
- Interest revenue on the receivable
- Note disclosures about the lease, including a general description of the leasing arrangement and the total amount of inflows of resources recognized from leases.

Governmental funds using current financial resource measurement focus should report a lease expenditure and other financing source in the period the lease is initially recognized, with subsequent payments accounted for consistent with the principles for debt service payments on long-term debt.

The following lease terminology is used throughout the instructions:

### **Intangible (Right-to-Use) Leases**

A contract that conveys control of the right to use another entity's nonfinancial asset as specified in the contract for a period of time in an exchange or exchange-like transaction, unless specifically excluded.

Exclusions include leases of one year or less, leases that transfer ownership at the end of the contract, investment leases, or leases of intangible assets, biological assets, inventory, supply contracts, service concession arrangements, or certain assets financed with outstanding conduit debt. (Reference GASB Codification I50.702 Definition and Characteristics of an Investment)

### **Financed Purchases**

Those contracts that transfer ownership of the underlying asset to the purchaser at the end of the contract. These include lease contracts that transfer ownership without termination options, also referred to as lease-purchase or lease-to-own agreements, lease-obligations (more than 10 years), and similar lease contracts of 10 years or less.

### **Financial Leases**

Obligations tied to securities such as lease-revenue bonds used to finance projects which are contractually to be repaid from lease revenues.

### **Lease-obligations (Purchase Agreements)**

“Lease-obligations” refer only to those lease agreements which have a term of “more than 10 years” and result in an asset acquisition, as defined by California Government Code Section 53892.2(g). Prior to GASB Statement No. 87, these leases were identified as capital leases. GASB Statement No. 87 redefined leases that transfer ownership as financed purchases, therefore the reference “Lease Obligations (Purchase Agreements)” has been added to the forms to distinguish lease-obligations that relate specifically to this code of law.

Per Government Code Section 53892.2(g), “Lease-obligations” means

- i. leases for a term of more than 10 years under which the local agency is the lessee and has the right, by option or otherwise, to acquire ownership of the property leased or
- ii. contracts whereby a local agency is obligated to make installment payments for a period of more than 10 years for an acquisition or improvement, such payments being made from a special fund, provided, that revenue bonds or any contract, indenture, resolution or ordinance providing for the issuance of revenue bonds shall not be deemed a lease-obligation.

### **Lease Receivable**

(Lessor) The present value of intangible (right-to-use) lease payments expected to be received over the entire lease term. Do not include leases that are excluded from intangible (right-to-use) lease definition.

### **Lease Asset (Lessee)**

The intangible (right-to-use) lease asset recorded at the present value of lease payments along with any direct costs for placing into service. Do not include leases that are excluded from intangible (right-to-use) lease definition.

Lessor Note: Do not report the underlying leased asset here; continue to report the lease asset in other investment or capital asset categories.

### **Lease Liability**

(Accrual, Lessee) The present value of payments expected to be made during the lease term for intangible (right-to-use) lease assets. Do not include leases that are excluded from intangible (right-to-use) lease definition.

## Reporting Instructions (Continued)

### **Lease Financing (Other Financing Source)**

(Mod. Accrual only, Lessee) The present value of the intangible (right-to-use) lease liability at the commencement of the lease. Do not include leases that are excluded from intangible (right-to-use) lease definition.

### **Lease Financing, Principal Payments**

(Mod. Accrual only, Lessee) Current principal payments made against liabilities related to intangible (right-to-use) leases. Include principal and interest.

### **Deferred Inflows Related to Leases**

(Lessor) An offset to the lease receivable and any prepayments received that are applicable to future periods, including applicable remeasurement amounts. Deferred inflow of resources should be adjusted by the same remeasurement amount as the corresponding lease receivable adjustment, with any reduction in excess of the remaining unamortized deferred inflow being recorded as a loss.

### **Lease Revenue**

(Lessor) Inflows of revenues from intangible (right-to-use) leases.

### **Lease Expenditure (Capital Outlay)**

(Mod. Accrual only, Lessee) The minimum present value of the intangible (right-to-use) lease asset (equal to the lease liability at the commencement of the lease plus acquisition costs and modifications)

Lessor Note: Do not report the underlying leased asset here; continue to report the underlying asset in other investment or capital asset categories.

### **Lease Expense**

(Accrual, Lessee) The current amortized cost for the intangible (right-to-use) lease asset. Also include any current upfront costs and variable costs that were not included in the valuation of the asset.

## **Fund Types**

### **Governmental Funds**

#### **General Fund**

The primary operating fund of the local agency, the general fund should be used to account for and report all financial resources not accounted for and reported in another fund. Per GAAP, there can be only one general fund.

#### **Special Revenue Funds**

Special revenue funds are used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects.

### **Debt Service Funds**

Debt service funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest. Debt service funds should be used to report resources if legally mandated. Financial resources that are being accumulated for principal and interest maturing in future years should also be reported in debt service funds.

### **Capital Projects Funds**

Capital projects funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets. Capital projects funds exclude those types of capital-related outflows financed by proprietary funds or for assets that meet the criteria for fiduciary activities (see “Definitions and Terminology” in the instructions).

### **Permanent Funds**

Permanent funds should be used to account for and report resources that are restricted to the extent that only earnings, and not principal, may be used for purposes that support the local agency’s programs—that is, for the benefit of the local agency or its citizenry. Permanent funds do not include private-purpose trust funds, which should be used to report situations in which the local agency is required to use the principal or earnings for the benefit of individuals, private organizations, or other governments.

## **Proprietary Funds**

### **Enterprise Funds**

Enterprise funds may be used to report any activity for which a fee is charged to external users for goods or services. Activities are required to be reported as enterprise funds if any one of the following criteria is met. Governments should apply each of these criteria in the context of the activity’s principal revenue sources.

- a. The activity is financed with debt that is to be repaid solely with the net revenues and charges of the activity, or
- b. Laws and regulations require that costs be recovered by revenues of the activity, or
- c. The pricing policies of the activity are designed to fully recover all costs.

### **Internal Service Funds**

Internal service funds may be used to report any activity that provides goods or services to other funds, departments, or agencies of the local agency and its component units, or to other governments, on a cost-reimbursement basis. Internal service funds should be used only if the local agency is the predominant participant in the activity. Otherwise, the activity should be reported as an enterprise fund.

## **Fiduciary Funds**

### **Pension and Other Employee Benefit Trust Funds**

Pension and other employee benefit trust funds are used to account for and report resources that are administered by plans that meet certain criteria of a trust held for the benefit of members and beneficiaries of defined benefit pension plans, defined contribution plans, other postemployment benefit plans, or other employee benefit plans.

### **Investment Trust Funds**

Investment trust funds are used to account for and report the external portion of investment pools that meet certain criteria for a trust, which are reported by the sponsoring government as required by GASB Statement No. 31, paragraph 18.

### **Private-Purpose Trust Funds**

Private-purpose trust funds are used to account for and report all other arrangements that meet certain criteria for a trust under which principal and income benefit individuals, private organizations, or other governments.

### **Custodial Funds**

Custodial funds should be used to account for and report resources that cannot be reported in one of the three trust fund categories, generally due to an absence of a qualifying trust agreement. Identify in a footnote any amounts in this column that are due to external portion of investment pools not held in trust.

## **Asset Classifications**

### **Current Assets**

Those assets which are available or can be made readily available to finance current operations or to pay current liabilities. Those assets that will be used up or converted into cash within one year. Some examples are cash, temporary investments and taxes receivable that will be collected within one year.

### **Noncurrent Assets**

All assets other than current assets.

### **Capital Assets**

Capital assets are used in the local agency's operations. They have initial useful lives extending beyond a single reporting period.

## **Liability Classifications**

### **Current Liabilities**

Debt or other obligations arising out of transactions in the past which must be liquidated, renewed, or refunded within one year. Liabilities do not include encumbrances.

## Reporting Instructions (Continued)

### **Noncurrent Liabilities**

All liabilities other than current liabilities.

### **Long-Term Obligations**

Long-term obligations are scheduled to mature beyond one year from the local agency's financial statement date.

### **Deferred Outflows of Resources**

The consumption of assets that is applicable to future reporting periods. A deferred outflow of resources has a positive effect on net position, similar to assets.

### **Deferred Inflows of Resources**

The acquisition of assets that is applicable to future reporting periods. A deferred inflow of resources has a negative effect on net position, similar to liabilities.

### **Fund Balance Classifications**

#### **Nonspendable**

Fund balance that cannot be spent because they are either:

- a. Not in spendable form; or
- b. Legally or contractually required to be maintained intact.

#### **Restricted**

Fund balance that can only be used for specific purposes pursuant to constraints that are either:

- a. Externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments; or
- b. Imposed by law through constitutional provisions or enabling legislation.

#### **Committed**

Fund balance that can only be used for specific purposes pursuant to constraints imposed by formal action of the local agency's highest level of decision-making authority.

#### **Assigned**

Fund balance that can only be used for specific purposes pursuant to constraints imposed by the local agency's intent, but are neither restricted nor committed. Intent should be expressed by either:

- a. The governing body itself; or
- b. A body (a budget or finance committee, for example) or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes.

## Reporting Instructions (Continued)

### **Unassigned**

The residual fund balance for the general fund. The general fund should be the only fund that reports a positive unassigned fund balance. In other governmental funds, if expenditures incurred for specific purposes exceeded the amounts restricted, committed, or assigned to those purposes, it may be necessary to report a negative unassigned fund balance.

### **Net Position Classifications**

#### **Net Investment in Capital Assets**

Capital assets, net of accumulated depreciation, reduced by the outstanding balances of bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets. Includes deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt. Does not include significant related debt proceeds or deferred inflows of resources unspent at the end of the reporting period. Instead, include the related debt or deferred inflows of resources in the same net position component (restricted or unrestricted) as the unspent amount.

#### **Restricted**

Restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Restricted assets are assets the use of which is subject to constraints that are either 1) externally imposed by creditors (debt covenants), grantors, contributors, or laws or regulations of other governments or 2) imposed by law through constitutional provisions or enabling legislation. Generally, a liability relates to restricted assets if the asset results from a resource flow that also results in the recognition of a liability or if the liability will be liquidated with the restricted assets reported.

#### **Unrestricted**

The net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in net investment in capital assets or restricted net position.

##### **Blended Component Unit**

Therefore, financial data from blended CUs are integrated into the appropriate city's funds, county's funds, or special district's funds for reporting purposes.

**Discretely Presented Component Unit**

Discretely Presented CUs (DPCUs) are legally separate from the city, county, or special district and usually provide services to entities and individuals outside the city, county, or special district. Therefore, financial data from DPCUs should be excluded from the county FTR, the city FTR, and the special district FTR.

## Statement of Expenditures – General Government

The Statement of Expenditures forms are presented by budget unit category. All expenditures should be classified into appropriately identified accounting or cost centers deemed necessary or desirable for budgetary control of financial operations. These budget units or cost centers should be further classified according to function and activity, and reported accordingly.

A “function” is a group of services aimed at accomplishing a certain purpose (e.g., "General Government", "Public Protection", "Public Ways and Facilities"). An “activity” is a specific line of work conducted by a county to perform its function (e.g., "Legislative and Administrative", "Finance", "Judicial", "Police Protection").

If a budget unit has multiple activities that must be allocated to various reporting categories, distribute or allocate these costs prior to completing this report. In cases where costs cannot be extracted directly from accounting records, the allocation should be based upon a reasonable estimate. It is possible that the expenditures of a budget unit will need to be allocated more than once.

Examples of activities that need to be reported within applicable functional categories are listed below. This listing is for illustrative purposes only and is not intended to be all-inclusive.

A county may have more or fewer reporting categories than those listed.

Note: All expenditure allocations should be made prior to completing the Statement of Expenditures forms in this report.

## 2023-24 General Instructions for County Financial Transactions Report

### Lease Obligations (Purchase Agreements) Form

This form applies only to “Lease-obligations” which have a term of “more than 10 years” and result in an asset acquisition, as defined by California Government Code Section 53892.2(g).

Prior to GASB Statement No. 87, these leases were identified as “Capital Leases”. GASB Statement No. 87 redefined leases that transfer ownership as a financed purchase, however, the law has not been updated to reflect GASB Statement No. 87 terminology, therefore the reference “Lease Obligations (Purchase Agreements)” has been added to the forms to distinguish lease-obligations that relate specifically to this code of law.

Per Government Code Section 53892.2(g), “Lease-obligations” means

- (i) leases for a term of more than 10 years under which the local agency is the lessee and has the right, by option or otherwise, to acquire ownership of the property leased or
- (ii) contracts whereby a local agency is obligated to make installment payments for a period of more than 10 years for an acquisition or improvement, such payments being made from a special fund, provided, that revenue bonds or any contract, indenture, resolution or ordinance providing for the issuance of revenue bonds shall not be deemed a lease-obligation.

Note: Prior-year records with outstanding balances will roll forward into the current-year form. Existing debt that was not previously reported, including internal service fund debt, should be reported as follows:

1. Create a new form for the previously unreported debt.
2. Report the current-year outstanding principal balance as an Adjustment to Principal in Current Fiscal Year.
3. Describe the reason for the adjustment in Reason for Adjustment to Principal in Current Fiscal Year.

Do not report long-term debts on lease-purchase agreements that are 10 years or less on this form. Report those on the Other Long-Term Debt form using the “Other” Debt Type.

Add a footnote to explain any differences between lease-obligations reported here and those reported on the county’s financial statements.

## 2023-24 General Instructions for County Financial Transactions Report

### Statement of Fiduciary Net Position – Fiduciary Funds Form

The purpose of this form is to report the assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position of the fiduciary funds of the local agency. Fiduciary fund types are pension and other employee benefit trust funds, investment trust funds, private-purpose trust funds, and custodial funds. All assets and liabilities should be reported on the accrual basis except for certain liabilities of defined benefit pension plans as indicated in GASB Statement No. 68.

#### **Fiduciary Activities**

Not all “trusts” are necessarily fiduciary in nature. According to GASB Statement No. 84, an activity is fiduciary if all of these criteria are met:

- a. The associated assets are controlled by the government,
- b. The assets are not derived from the government’s own-source revenues, government-mandated nonexchange transactions, or other voluntary nonexchange transactions, other than externally administered/financed pass-through grants, and
- c. Has certain qualifying characteristics regarding the external administration, derivation of revenues, and protections from creditors, as defined by GAAP.

For further details, see the GASB Codification, Section 1300.128 through 1300.136 for fiduciary activities and Section N50.04 for classes of nonexchange transactions, accessible through the Governmental Accounting Research System (GARS) at GASB.org.

#### **Pass-through Grants**

Pass-through grants are usually reported in the funds of the primary government, however, if the local agency is merely a cash conduit (no administrative or direct financial involvement) for cash pass-through grants not held in a trust, it should be reported in the custodial funds. Report the cash or due from other governments and an equal account payable or due to other governments in the custodial funds for those pass-through grants received or receivable but not disbursed at fiscal year-end.

#### **Fiduciary Fund Types**

## 2023-24 General Instructions for County Financial Transactions Report

# Noncurrent Assets, Deferred Outflows of Resources, Noncurrent Liabilities, and Deferred Inflows of Resources – Governmental Funds Form

The purpose of this form is to report the noncurrent assets, deferred outflows of resources, noncurrent liabilities, and deferred inflows of resources of the governmental funds of the local agency. Do not include noncurrent assets, deferred outflows of resources, noncurrent liabilities, and deferred inflows of resources of internal service funds (ISFs). ISFs should be reported in the Statement of Net Position – Proprietary Funds form.

GASB Statement No. 34 eliminated the reporting requirements of general fixed assets and general long-term obligations for governmental funds and introduced the government-wide financial statements. The accrual-based government-wide financial statements present current and noncurrent accounts for governmental funds as opposed to the fund financial statements, on which the financial transactions report is based. To collect the data for noncurrent accounts for governmental funds, the Capital Assets and Long-Term Obligations form was revised and renamed as the Noncurrent Assets, Deferred Outflows of Resources, Noncurrent Liabilities, and Deferred Inflows of Resources form.

### **Noncurrent Assets**

#### **Lease Receivable**

Report accrual adjustments to lease receivables for intangible (right-to-use) lease payments expected to be received over the entire lease term. Do not include leases that are excluded from intangible (right-to-use) lease definition.

##### **Equipment (Report at cost.)**

Report the cost or, if acquired by gift, the appraised value at the date received, of all physical property of a permanent nature, other than land, buildings, and improvements.

Buildings, except those that are an ancillary part of a network of infrastructure assets, should not be considered infrastructure assets.

# 2023-24 General Instructions for County Financial Transactions Report

## Parcel Tax Form

Per Government Code section 12463.2, the levying local agency that imposes the parcel tax shall be the entity to complete this report. "Levying local agency" means any county, city, or special district that has the power to levy or have levied on its behalf, parcel taxes, as defined by Government Code section 12463.2(c), upon property within the applicable territory of that county, city, or special district (including but not limited to Community Facilities Districts, Financing Districts, Zone of Benefits, Transportation Planning Agency, Transit Operator, etc.). The levying local agency is the one responsible for submitting the parcel tax measure to the ballot to be approved by voters (if applicable); and for submitting all of the necessary documents to the county auditors to be included in property tax bills for collections. The levying local agency must report, even if the revenue received from the tax measure is allocated to another local agency.

### **Parcel Tax Name**

Use the legal name of the parcel tax. For the majority of agencies reporting, this is the ballot measure title.

### **Requirement A. The Type and Rate of Parcel Tax Imposed**

Parcel Tax Type is the basis upon which a local agency determines how a parcel tax will be levied upon a parcel, including, but not limited to residential, nonresidential, improved, etc.

Parcel Tax Rate is the parcel tax amount levied on each parcel using a parcel tax base, including, but not limited to: a flat rate levy, age of the parcel, "per acre" basis, "per unit" basis, etc.

#### Notes

This section should be used for any multiple variables that the parcel tax rate might have. For example, a parcel tax might charge \$10 per unit for one to three units, then \$7 per unit for four through eight units and then \$5 per unit for nine units or more.

### **Parcel Tax Type**

#### **All Property**

If parcel tax is not imposed on a specific type of property and is uniformly imposed on all property, report the dollar amount of the rate and the appropriate parcel tax base for this property type.

#### **All Residential**

If parcel tax is not imposed on a specific type of residential property and is uniformly imposed on all residential property, report the dollar amount of the rate and parcel tax base for this property type. Residential property is property used for human habitation with the primary purpose of living/sleeping.

### **Residential Subcategories**

If parcel tax is imposed on a specific type of residential property, report the following applicable parcel tax type:

**a. Single-Family**

If the parcel tax type is a single-family residence, report the dollar amount of the rate and parcel tax base for this property type. A single-family residence is a structure maintained and used as a single dwelling unit.

**b. Multi-Family**

If the parcel tax type is a multi-family residence, report the dollar amount of the rate and parcel tax base for this property type. A multi-family residence is a single building or structure designed to house several families in separate housing units. The most common type of multi-family housing is an apartment building. Duplexes, quadraplexes, and townhomes also qualify as multi-family housing. The entire building or structure may be owned by an individual, an entity, or, as is the case with condominiums, by individuals who have purchased units within the larger structure.

**c. Condominiums**

If the parcel tax type is a condominium, report the dollar amount of the rate and parcel tax base for this property type. Condominiums are individually owned housing units in a multi-unit building. The condominium owner holds sole title to the unit, but owns land and common property (elevators, halls, roof, stairs, etc.) jointly, or in common, with other unit owners, and shares the upkeep expenses on the common-property with other owners. The unit owner pays property taxes only on his or her unit, and may mortgage, rent, or sell it like any other real property.

**d. Mobile Homes**

If the parcel tax type is a mobile home, report the dollar amount of the rate and parcel tax base for this property type. Mobile homes include portable structures that are built on a chassis or affixed to a foundation and which may be used as a permanent dwelling unit.

### **All Nonresidential**

If parcel tax is not imposed on a specific type of nonresidential property and is uniformly imposed on all nonresidential property, report the dollar amount of the rate and parcel tax base for this property type. Nonresidential property is property not used for living or sleeping.

### **Nonresidential Subcategories**

If parcel tax is imposed on a specific type of nonresidential property, report the following applicable parcel tax type:

**a. Commercial**

If the parcel tax type is commercial, report the dollar amount of the rate and parcel tax base for this property type. "Commercial real property" means any real property improved with, or consisting of, a building that is intended for commercial use, including hotels and motels, and which is not residential.

**b. Industrial**

If the parcel tax type is industrial, report the dollar amount of the rate and parcel tax base for this property type. "Industrial property" means any property used for manufacturing or producing goods. This includes manufacturing factories.

**c. Institutional**

If the parcel tax type is institutional, report the dollar amount of the rate and parcel tax base for this property type. "Institutional property" means a building or structure, or a portion thereof, in which people are cared for or live in a supervised environment, including people who have physical limitations because of health or age, or in which people are detained for penal or correctional purposes, or in which the liberty of the occupants is restricted.

This group includes, but is not limited to, the following: (1) adult homes, where occupants are capable of self-preservation; (2) alcohol and drug abuse rehabilitation centers; (3) assisted living facilities; (4) halfway houses; (5) residential care facilities; and (6) correctional Institutions.

**d. Recreational**

If the parcel tax type is recreational, report the dollar amount of the rate and parcel tax base for this property type. "Recreational property" means property used for recreational activities.

### **Unimproved/Undeveloped**

If the parcel tax type is unimproved or undeveloped, report the dollar amount of the rate and parcel tax base for this property type. "Unimproved land" means a parcel without improvements (such as buildings or fixtures, regardless of whether or not a building permit has been issued); and which is either not in use or is only in temporary use. This category also includes any undeveloped land, as well as Community Facilities District (CFD) parcel tax on undeveloped parcels.
