

Alia Mendonsa

Executive Counselor

Info-Tech Research Group

Alia Mendonsa has worked with public sector organizations for over 25 years, examining federal policy and funding for state and local governments, and supporting the development and execution of their digital strategies.

As an executive counselor at Info~Tech, Alia helps leaders to establish digital vision and incorporate emerging technologies to execute a digital strategy that reimagines citizen service delivery models and delivers on the promise of Exponential IT. She supports clients with critical initiatives such as enterprise application modernization and digital transformation and cultivates exceptional leadership among CxOs and their teams.

Before joining Info-Tech, Alia served as a senior director and analyst for Gartner, Inc. Her coverage included government-specific applications as well as key policy and funding, top digital government trends, and emerging technologies. She has also consulted extensively with technology and service providers to refine their product development and go-to-market strategies.

Prior to her analyst role as an executive partner, Alia was a leadership coach and consigliere to CxOs in government at Gartner. She started her career in government technology at e.Republic and served as the research director for the Center for Digital Government, leading the custom research and advisory services programs.
