

State of California
*Budgetary/
Legal Basis
Annual Report*

For the Fiscal Year Ended June 30, 2007

Controller *John Chiang*
California State Controller's Office

JOHN CHIANG
California State Controller

JOHN CHIANG
California State Controller

May 15, 2008

To the Citizens, Governor, and Members of the
Legislature of the State of California:

I hereby submit the State of California's *Budgetary/Legal Basis Annual Report*. This report shows the financial condition of all funds and the results of their operations for the fiscal year ended June 30, 2007.

Major highlights of this budgetary report include the following:

- General Fund revenues totaled \$95.9 billion, an increase of \$2 billion from the 2005-06 fiscal year.
- California's General Fund, the State's primary funding source for general government services, ended the 2006-07 fiscal year with a fully reserved fund balance of \$6.0 billion. Reserved funds are set aside for specific purposes and, therefore, not available for appropriation.
- Included in the General Fund's reserved fund balance is \$3.4 billion in the Special Fund for Economic Uncertainties (the State's "rainy day fund").
- Bonds Authorized and Unissued increased \$32.0 billion from the 2005-06 fiscal year. This increase is a result of the General Obligation Bonds approved by voters in November 2006. These bonds fund existing housing programs, and will finance projects related to local transportation improvement, safe drinking water, and flood protection.

This report is prepared in compliance with Government Code Section 12460 and in conformance with the Governor's Budget and the Budget Act. I have also issued the *Comprehensive Annual Financial Report*, prepared strictly in accordance with accounting principles generally accepted in the United States of America (GAAP), which in some instances differ from those used to prepare the *Budgetary/ Legal Basis Annual Report*. The GAAP report is primarily intended to meet the needs of users outside of state government. A reconciliation between these two bases of accounting is contained in the GAAP report.

I wish to express my appreciation to all of the state agencies for their continued cooperation and efforts to submit timely reports. I am also grateful to the members of my staff for their professionalism, dedication, and hard work.

Sincerely,

Original signed by:

JOHN CHIANG
California State Controller

Notes
to the
Financial
Statements

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

The accompanying financial statements present the financial position and the results of operations of the State for the year ended June 30, 2007. These statements have been prepared in compliance with state laws, state accounting procedures, and the state budget.

The State of California also prepares a separate report, the *Comprehensive Annual Financial Report*, which includes financial statements prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). A copy of this report is available online, at www.sco.ca.gov, or from the State Controller's Office, Division of Accounting and Reporting, P. O. Box 942850, Sacramento, California 94250-5875.

The State of California *Budgetary/Legal Basis Annual Report* presents information on those financial activities of the State over which the Governor, the Legislature, and other elected officials have direct or indirect governing and fiscal control. The financial statements in this report include accounts of various boards, commissions, agencies, authorities, retirement systems, and the State's public universities. The funds from which these entities operate are included in this report in accordance with Government Code Section 12461(b)(3), which requires the *Budgetary/Legal Basis Annual Report* to include statements showing the receipts, disbursements, and closing balances of each fund in the State Treasury.

The University of California, including its various branches, is administered by a Board of Regents as a public trust. It is subject only to such legislative control as may be necessary to ensure compliance with the terms of the endowments of the university and the security of its funds. The financial transactions of the University of California that are included in this report are only the amounts appropriated by the Legislature for support and capital outlay. Expenditures from these appropriations are included as part of the cost of state government.

The financial transactions of district agricultural associations, citrus fairs, and county fairs are included only with regard to the disbursement of state funds appropriated for their use. These associations and fairs are semi-independent and operate with both state and local funds.

B. Fund Accounting

The diverse nature of governmental operations and the need to comply with legal provisions require that the accounts of the State be organized on the basis of funds rather than the single set of accounts commonly used by commercial enterprises.

Each fund is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts comprised of its assets, liabilities, fund equity, revenues, and expenditures or expenses, as appropriate.

These funds of the State are divided into two main groups: Governmental Cost Funds and Nongovernmental Cost Funds.

Governmental Cost Funds consist of those funds that receive revenues derived from taxes, licenses, and fees. Expenditures of these funds represent the cost of government. Two major fund classifications exist in this group: the General Fund and Special Funds. The purpose of each fund classification is as follows.

The *General Fund* is the main operating fund of the State, consisting of moneys that are not required by law to be deposited in any other fund.

Special Funds are used to account for resources that are legally restricted for particular functions or activities of government. The following are classified as special funds.

- *General Fund Special Accounts* are accounts within the General Fund created by the Legislature to account for revenues that are restricted by law for specific purposes. The accounts are treated as special funds and are excluded from the General Fund for accounting and budgetary purposes.
- *Feeder Funds* are the depositories for the collection of major taxes prior to clearance to the General Fund. The resources and obligations of these funds that apply to the General Fund as of June 30 are included in Due From Other Funds. Resources and obligations remaining in any of these funds represent collections that were not available to the General Fund on June 30.
- *Transportation Funds* are used to account for revenues that are restricted by law to transportation and related public safety programs.
- *Other Governmental Cost Funds* are used to account for other revenues that are restricted by law for specific purposes.

Nongovernmental Cost Funds consist of funds that derive their revenue from sources other than general and special taxes, licenses, fees, or other state revenues. Expenditures of these funds do not represent a cost of government. Three major fund classifications exist under this group: Bond Funds, Trust and Agency Funds – Federal, and Other Nongovernmental Cost Funds. The purpose of each fund classification is as follows.

Bond Funds are used to record proceeds from the sale of general obligation bonds and expenditures for acquisition of property, capital outlay, or loans to local agencies for the same purposes.

Trust and Agency Funds – Federal are used to account for moneys that are received from the federal government to be expended for specific purposes.

Other Nongovernmental Cost Funds are used to account for the following revenues and services.

- *Public Service Enterprise Funds* are used to account for the transactions of state-operated enterprises that render services primarily to the public for a charge.
- *Working Capital and Revolving Funds* are used to account for the internal service activities rendered by a state agency to other state agencies or local governments.
- *Retirement Funds* are used to account for contributions received by various retirement systems, the investment of these moneys, retirement allowances, and refunds to members.
- *Trust and Agency Funds – Other* are used to account for moneys and properties that are received and disbursed by the State as trustee or custodian.

C. Measurement Focus and Basis of Accounting

Governmental cost funds are presented in this publication using the flow of current financial resources measurement focus. With this measurement focus, operating statements present increases and decreases in net current assets.

Generally, the accounts of the governmental cost funds are reported using the modified accrual basis of accounting. Revenues of the governmental cost funds are recognized according to the provisions of Government Code sections 13302 and 13303. Revenues are accrued if the underlying transaction has occurred as of the last day of the fiscal year and the due date for the tax is within two months of the end of the fiscal year. Receivables for which collection is indefinite are fully reserved until collected or determined to be uncollectible.

Expenditures of governmental cost funds include obligations incurred but not paid by June 30. This includes all interfund settlements due but not completed at the end of the fiscal year. Encumbrances at year-end (such as obligations in the form of purchase orders, contracts, or salary commitments chargeable to an appropriation) are excluded from the liabilities and expenditures and are established as a reserve for encumbrances against the fund balance. Transfers from governmental cost funds to nongovernmental cost funds are shown as expenditures of the governmental cost funds in the fiscal year covered by this report, even though actual expenditures from the nongovernmental cost funds may not occur until a later date (e.g., transfers to the Architecture Revolving Fund for capital outlay purposes).

The measurement focus for nongovernmental cost funds varies among fund types. Proprietary fund types and pension trust funds are presented using the flow of economic resources measurement focus; the other fund types are presented using the flow of current financial resources measurement focus.

The basis of accounting for nongovernmental cost funds also varies among fund types. The accounts of the proprietary fund types and the pension trust funds are reported using the accrual basis of accounting. Under the accrual basis, revenues are recognized when they are earned and expenses are recognized when they are incurred. The accounts of the other fund types are reported using the modified accrual basis of accounting.

D. Fixed Assets

Fixed assets are reported in this publication only for nongovernmental cost funds. They are reported at cost or estimated historical cost. Donated fixed assets are stated at fair market value at the time of donation. Interest during construction has not been capitalized. Also, public domain or “infrastructure” fixed assets are not capitalized.

General fixed assets for governmental cost funds are reported as expenditures at cost in the year purchased.

E. Long-Term Obligations

The State Constitution permits the State to issue general obligation bonds for specific purposes and in such amounts as approved by a two-thirds majority of both houses of the Legislature and by a majority of voters in a general or primary election. Proceeds from the sale of general obligation bonds, including premium and accrued interest, are recorded in the Bond Funds. The debt service for general obligation bonds is appropriated from the General Fund. Premium and accrued interest received when bonds are sold is transferred to the General Fund to reimburse the debt service. Under the State Constitution, the General Fund is first used to support the public school system and public institutions of higher education. The General Fund can then be used to service the debt on outstanding general obligation bonds. Self-liquidating bonds reimburse the General Fund for the debt service provided on their behalf.

F. Fund Equity

The term *fund balance* is defined as the excess of the assets of a fund over its liabilities. Part or all of the total fund balance may be reserved as a result of law or generally accepted accounting principles. Reserves represent those portions of the fund balance that are legally segregated for specific uses.

Contributed Capital represents the amount of capital contributed to proprietary funds, including permanent working capital advanced by other funds that is not required to be repaid.

Reserved for Encumbrances represents goods and services that are ordered, but not received, by the end of the fiscal year.

Reserved for Employees' Pension Benefits represents reserves of the retirement funds. These reserves include accumulated contributions made by employees and employers, and undistributed interest and investment earnings.

Reserved for Unencumbered Balances of Continuing Appropriations represents the unencumbered balance of all appropriations for which the period of availability extends beyond the period covered by this report. These appropriations are legally segregated for a specific future use.

Reserved for Deposits represents the balance of trust and agency funds outside the State Treasury that accounts for money or property held by state agencies that is not required to be deposited in a fund in the State Treasury.

Other Reserves represents the amounts reserved for other specific purposes.

The *Special Fund for Economic Uncertainties* (SFEU) was created by Chapter 139, Statutes of 1985, and is funded with General Fund revenues. Commonly known as the State's "rainy day fund," it provides the moneys for necessary expenditures throughout the year that have not been anticipated or provided for in the annual budget. It also provides relief, to the amount of its available funds, for any budgeted shortfalls. As of June 30, 2007, the SFEU balance consists of the existing balance of \$1.6 billion from the Special Fund for Economic Uncertainties plus an additional \$1.8 billion from the General Fund Unreserved-Undesignated balance.

The *Contingency Reserve for Economic Uncertainties* represents the unappropriated balance in each special fund, as of June 30, that is available for appropriation in the following fiscal year.

Unreserved-Undesignated represents the net of the total fund balance less reserves. A negative unreserved-undesignated balance must be funded before any amount is available for appropriation.

Included in the fund equity are the balances of all appropriations for which the availability for encumbrance and expenditure expired before or at the end of the fiscal year covered by this report.

G. Pooled Money Investment Account Loans

Cash temporarily idle during the year was invested in the Pooled Money Investment Account (PMIA). The investment of the PMIA is restricted by law to certain categories, including loans to various bond funds. Outstanding loans to the various bond funds as of June 30 are reflected in this report as PMIA Loans Payable in the bond funds and as PMIA Loans Receivable in each fund group in the Combined Balance Sheet. PMIA Loans Receivable are not reflected in the individual fund statements of this report because the loans were made directly from the PMIA, and the specific funds providing the loans are not identifiable.

H. Comparative Statements

This report includes the Comparative Statement of Actual and Estimated Revenues and the Comparative Statement of Actual and Budgeted Expenditures for the year ended June 30, 2007. The Comparative Statement of Actual and Estimated Revenues compares the actual governmental cost fund revenues earned with the estimated revenues reflected in Schedule 8, Comparative Statement of Revenues, of the 2007-08 Governor's Budget Summary. The Comparative Statement of Actual and Budgeted Expenditures compares the actual governmental cost fund expenditures incurred with the total appropriations for the 2006-07 fiscal year.

I. Appropriations Limit

The State is subject to an annual appropriations limit imposed by Article XIII B of the California Constitution. Article XIII B established a limit on the growth of certain appropriations made from state tax revenues, adjusted annually for inflation and population growth. All tax revenues received are to be appropriated within the limit or returned to the taxpayers. Propositions 98 and 99, approved by voters in the November 1988 general election, established the limit, and Proposition 111, approved by voters in the June 1990 general election, amended Article XIII B.

Proposition 98 requires that tax revenues received in excess of the state appropriations limit be allocated to school districts and community colleges (K-14) rather than returned to the taxpayers. The amount to be allocated is not to exceed 4% of the minimum school funding level. Effective in the 1988-89 fiscal year, Proposition 98 provides a guaranteed minimum level of funding for school districts and community colleges. The K-14 programs are guaranteed either the same percentage of General Fund revenues appropriated in the 1986-87 fiscal year or the state and local tax revenues received in the prior year, adjusted for changes in enrollment and the cost of living, whichever is greater.

Proposition 99, the Cigarette Tax Initiative, placed an additional tax on cigarette purchases in California. Before the enactment of Proposition 99, an additional tax would have been considered revenue subject to the appropriations limit. This initiative specified that this additional tax revenue is not subject to the appropriations limit and dedicated the revenue for specific purposes.

Proposition 111 provides that tax revenues received in excess of the state appropriations limit in one fiscal year may be carried over to the succeeding fiscal year. The portion of the excess revenues carried over that are not appropriated in that fiscal year would be considered excess revenues. Fifty percent of all excess revenues must be allocated to school districts and community colleges, and the other 50% must be returned to the taxpayers. Prior to the enactment of Proposition 111, the maximum amount to be allocated to school districts and community colleges was 4% of the minimum school funding level. Proposition 111 excludes from the State's appropriations limit appropriations for the costs of natural disasters, appropriations for all qualified capital outlay projects, and appropriations of revenue derived from increases in motor vehicle fuel taxes, sales and use taxes on the increased motor vehicle fuel taxes, and weight fees.

Article XIII B imposes no limit on appropriations or funds obtained through nontax sources, such as bond proceeds and reasonable user charges or fees. The state appropriations limit is also exclusive of certain appropriations, such as debt service on voter-approved debt, debt existing when Article XIII B was adopted, and state subventions to local governments that are not restricted in their use. State appropriations to local governments are considered tax proceeds for local entities and are subject to each local entity's revenue and appropriations limit.

The appropriations limit is established each year in the Budget Act and is amended during the fiscal year for transfers of fiscal responsibility between the State and local governments. The Budget Act provides that any

judicial action or proceeding to attack, review, set aside, void, or annul the revenue and appropriations limit must begin within 45 days of the effective date of the act. No such judicial actions have been taken or proceedings begun.

J. Cash Management

As part of its cash management program, the State issues short-term obligations, known as revenue anticipation notes (RANs), to meet cash flow needs during the fiscal year. On October 3, 2006, the State issued \$1.5 billion of RANs. These RANs were repaid with interest on June 29, 2007.

NOTE 2: BUDGETARY AND LEGAL COMPLIANCE

The State's annual budget is prepared primarily on a modified accrual basis for governmental funds. Each year, the Governor recommends a budget for approval by the Legislature that includes estimated revenues; however, revenues are not included in the budget adopted by the Legislature. Under state law, the State cannot adopt a spending plan that exceeds estimated revenues.

Under the State Constitution, money may be drawn from the State Treasury only through a legal appropriation. The appropriations contained in the Budget Act, as approved by the Legislature and signed by the Governor, are the primary sources of annual expenditure authorizations and establish the legal level of control at the appropriation level for the annual operating budget. The budget can be amended throughout the year by special legislative action, budget revisions by the Department of Finance, or executive orders of the Governor.

Appropriations are generally available for expenditure or encumbrance either in the year appropriated or for a period of three years if the legislation does not specify a period of availability. At the end of the availability period, the encumbering authority for the unencumbered balance lapses. Some appropriations continue indefinitely, while others are available until fully spent. Generally, an encumbrance must be liquidated within two years from the end of the period when the appropriation is available. If the encumbrance is not liquidated within this additional two-year period, the spending authority for the encumbrance lapses.

In November 1988, voters of the State approved Proposition 98, a constitutional amendment called the Classroom Instructional Improvement and Accountability Act. Proposition 98 establishes a minimum funding level, or guarantee, for education. The amount guaranteed depends on a number of factors, according to formulas specified in Section 8 of Article XVI of the State Constitution. Expenditures are recognized for all Proposition 98 appropriations in the year funds are appropriated.

Legislative appropriations are based on the year that commitments for goods and services are incurred. However, for financial reporting purposes, the State reports expenditures based on the year that goods and services are received.

State agencies are responsible for exercising basic budgetary control and ensuring that appropriations are not overspent. The State Controller's Office is responsible for overall appropriation control and does not allow expenditures in excess of authorized appropriations.

Financial activities are mainly controlled at the appropriation level but this can vary, depending on the schedules and wording contained in the Budget Act. Certain items that are established at the category, program, component, or element level can be adjusted by the Department of Finance. While the financial activities are controlled at various levels, the legal level of budgetary control has been established in the Budget Act at the appropriation level for the annual operating budget.

NOTE 3: LONG-TERM OBLIGATIONS

A. Capital Appreciation Bonds

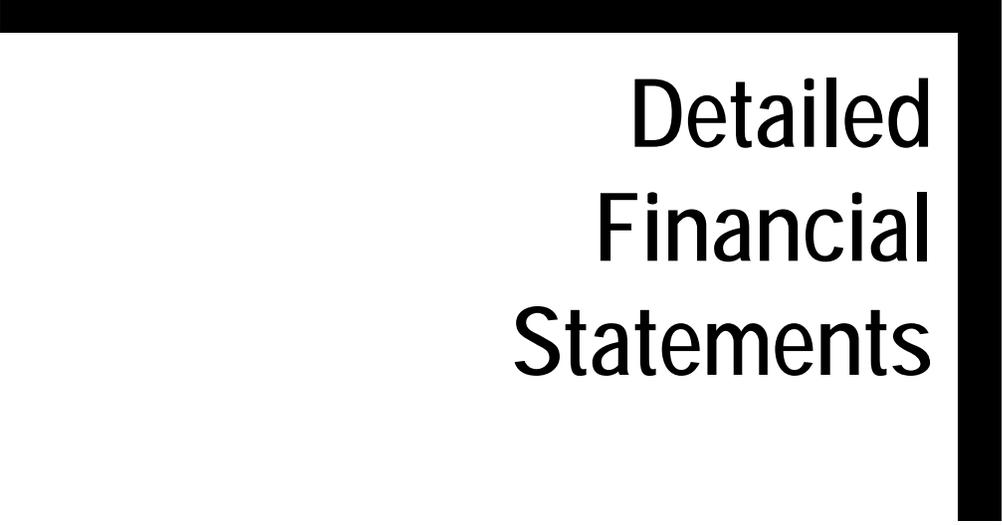

The State issued capital appreciation bonds in the amount of \$17 million with a delivery date of April 1, 1993. The bonds were issued in denominations of principal amounts per \$1,000 value, payable in full at maturity. Unlike all other bonds issued by the State, these bonds are not subject to redemption prior to their stated maturities, and no current interest payments will be made prior to maturity. In the General Obligation Bonds, Interest and Redemption statement, the accreted value is included in the “Bonds Outstanding” column and the “Issued” column. The accreted value represents the portion of the face value of the bonds that reflects principal and interest accrued to date. For June 30, the accreted value is interpolated on a straight-line basis between the accreted value for the immediately preceding April 1 and the next succeeding October 1, as displayed in the official bond statement. As of June 30, 2007, the accumulated interest of the bonds outstanding was \$5.1 million.

B. Defeased Bonds

The State has defeased certain bonds by placing the proceeds of new bonds in irrevocable escrow in a special trust account with the State Treasury to provide for all future debt service payments on the refunded bonds. Accordingly, the assets of the trust accounts and the liability for the defeased bonds are not included in the State’s financial statements. As of June 30, 2007, the outstanding balance of general obligation bonds defeased was approximately \$7.8 billion.

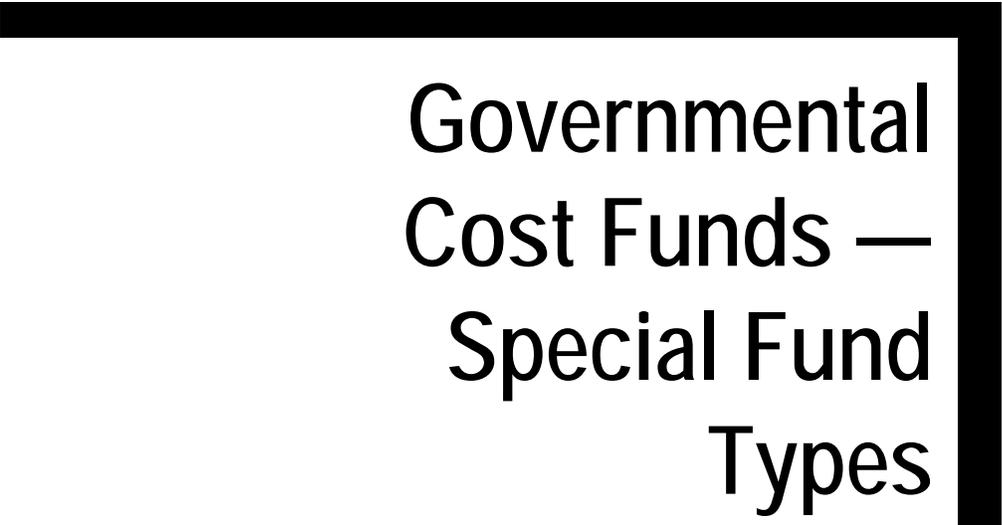

C. Commercial Paper Notes

The general obligation commercial paper program was established pursuant to Chapter 697, Statutes of 1995. Under this program, the State issues general obligation commercial paper notes that may be renewed or may be refunded by the issuance of general obligation bonds. Commercial paper notes are deemed issued upon authorization by the respective finance committees.
