

CALIFORNIA STATE TEACHERS' RETIREMENT SYSTEM

Interim Cost Analysis Report

EARLY RETIREMENT INCENTIVE PROGRAM

Fiscal Year Ended June 30, 2021

BETTY T. YEE
California State Controller

March 2022

BETTY T. YEE
California State Controller

March 30, 2022

The Honorable Gavin Newsom
Governor of the State of California
State Capitol, First Floor
Sacramento, CA 95814

Dear Governor Newsom:

I am pleased to provide you with the State Controller's cost analysis of the Early Retirement Incentive Program for members of the California State Teachers' Retirement System for fiscal year 2020-21. This report complies with California Education Code section 14502.1(d).

Due to the COVID-19 pandemic, all California local educational agencies received an automatic extension of the due date for submission of their annual audit reports. Per California Education Code section 41020(h)(3), the due date was extended to January 31, 2022.

This report was prepared based on a limited number of annual audit reports received as of February 24, 2022. We anticipate issuing a revised cost analysis of the Early Retirement Incentive Program report at a future date after we have received all of the local education agencies reports for fiscal year 2020-21.

Questions regarding the report should be directed to my Chief Operating Officer, Kathleen Webb, at (916) 552-8080.

Sincerely,

Original signed by

BETTY T. YEE

Cost Analysis	2
Conclusion	3

Summary

In accordance with California Education Code section 14502.1(d), the State Controller's Office (SCO) conducted a cost analysis of the Early Retirement Incentive Program for members of the California State Teachers' Retirement System (CalSTRS).

Due to the COVID-19 pandemic, all California local educational agencies (LEAs) received an automatic extension of the due date for submission of their annual audit reports. Per California Education Code section 41020(h)(3), the due date was extended to January 31, 2022.

We anticipate receiving approximately 2,100 audit reports for fiscal year (FY) 2020-21. As of February 24, 2022, we have received only 1,418 audit reports. The majority of the LEAs that did not submit their audit reports by the required deadline have requested additional time to submit their reports. We anticipate issuing a revised cost analysis report of the CalSTRS Early Retirement Incentive Program after we have reviewed all LEA audit reports submitted for FY 2020-21.

This report was prepared based on a limited number of annual audit reports received as of February 24, 2022. Based on 1,418 LEA audit reports received as of that date, a total of four LEAs, including school districts and county offices of education, participated in the CalSTRS Early Retirement Incentive Program. In the prior year, 14 LEAs participated in the program.

The analysis was prepared using information included in LEA audit reports submitted to SCO for FY 2020-21. SCO did not perform any procedures to verify the accuracy of the information included in the LEA audit reports. SCO reviewed the reports to determine the net savings or costs resulting from formal actions taken by LEAs to encourage the retirement of certificated or academic employees.

The CalSTRS Early Retirement Incentive Program resulted in a net cost of \$2,162,090 during FY 2020-21. The total program cost was \$2,996,057 through June 30, 2021, and was calculated based on one-time retirement contributions by the LEAs. The annual savings realized in FY 2020-21 is estimated to be \$833,967. Accordingly, the total program cost will be recovered in 3.59 years. Based on data presented in this report, the LEAs will achieve cost savings in future years.

Background

California Education Code section 14502.1(d) states:

The Controller shall annually prepare a cost analysis, based on the information included in the audit reports for the prior fiscal year, to determine the net savings or costs resulting from formal actions taken by school districts and county offices of education pursuant to Sections 22714 and 44929, and shall report the results of the cost analysis to the Governor and the Legislature by April 1 of each year.

In addition, California Education Code section 22714(a) states:

Whenever the governing board of a school district or a community college district or a county office of education, by formal action, determines pursuant to Section 44929 or 87488 that, because of impending curtailment of, or changes in, the manner of performing

services, the best interests of the district or county office of education would be served by encouraging certificated employees or academic employees to retire for service and that the retirement will result in a net savings to the district or county office of education, an additional two years of service credit shall be granted [to employees if certain specified conditions exist].

Scope and Methodology

SCO receives LEAs' annual audit reports, which are prepared by independent auditors, and completes an extensive review of the financial and compliance information presented in the reports. In order to maintain consistency in the presentation of the data received, California Education Code section 14502.1(c) prescribes the audit report disclosure criteria. The analysis presented in this report is based solely on the data disclosed in those audit reports.

Due to the COVID-19 pandemic, we did not receive all of the LEA audit reports that were required to be submitted to our office by January 31, 2022. We anticipate receiving approximately 2,100 audit reports for FY 2020-21. As of February 24, 2022, we have received only 1,418 audit reports. The majority of the LEAs that did not submit their audit reports by the required deadline have requested additional time to submit their reports. We anticipate issuing a revised cost analysis report of the CalSTRS Early Retirement Incentive Program after we have reviewed all LEA audit reports submitted for FY 2020-21.

Based on the 1,418 LEA audit reports received as of February 24, 2022, a total of four LEAs participated in the CalSTRS Early Retirement Incentive Program. The audit reports for those LEAs must disclose the following in the Notes to the Basic Financial Statements:

- The number and type of positions vacated;
- The age, service credit, salary, and, separately, the benefits of the retirees receiving the additional service credit;
- A comparison of the salary and benefits of each retiree with the salary and benefits of the replacement employee, if any; and
- The resulting retirement cost, including interest, if any, and post-retirement healthcare benefit costs incurred by the employer.

Cost Analysis

This cost analysis was limited to the four LEAs that participated in the CalSTRS Early Retirement Incentive Program for FY 2020-21. The LEA independent auditors did not perform any procedures to verify the accuracy of the early retirement information contained in the Notes to the Basic Financial Statements. SCO compiled information from the Notes to the Basic Financial Statements to obtain the totals and averages shown in Table 1. The table also shows cost data for FY 2018-19 and FY 2019-20 for purposes of comparison.

Table 1—Interim Cost Analysis

Fiscal Year	Average Age of Retiree (Years)	Average Years of Service Credit	Average Number of Positions Vacated	Total Annual Personnel Savings ¹	Total Additional One-Time Costs	Net (Cost) or Savings for the Initial Year ²
2020-21	60.53	27.16	5.00	\$ 833,967	\$ 2,996,057	\$ (2,162,090)
2019-20	61.69	27.98	7.07	\$ 5,710,810	\$ 8,132,528	\$ (2,421,718)
2018-19	62.66	26.02	5.57	\$ 3,836,903	\$ 5,531,272	\$ (1,694,369)

Source: LEA Annual Reports

¹ Current years savings

² Net costs for the initial year the employees participated in the program is the difference between the total annual personnel savings and the total additional one-time costs.

Conclusion

As shown in Table 1, for FY 2020-21, based on the limited number of annual audit reports received as of February 24, 2022, an average of five positions per participating LEA were vacated in exchange for the extra two years of service credit. The LEAs incurred additional one-time retirement costs totaling \$2,996,057; these costs will be recovered in 3.59 years. Although some of the vacated positions were refilled during the year, the annual net savings of personnel costs is projected to be \$833,967 on the presumption that, without the Early Retirement Incentive Program, all of the retirees would have chosen to continue working.

The payroll savings total is the difference between the payroll costs of retirees and the payroll costs of their less-costly replacements. However, as the replacements will receive periodic pay raises, the payroll savings total will decline by the amount of the raises. The net cost to the LEAs in FY 2020-21 was \$2,162,090. Based on limited data presented in this report, we believe that the LEAs will achieve cost savings in future years. However, due to the limited number of reports received, we are unable to determine whether all LEAs will achieve cost savings in future years. We will make this determination and issue a revised cost analysis report of the CalSTRS Early Retirement Incentive Program after we have reviewed all of the LEAs' audit reports submitted for FY 2020-21.
