## **Notice to Investigators**

### **Revision to the Unclaimed Property Search Website Notice of Property Being Held By Business November 4, 2014**

The State Controller's Office would like to make you aware of a recent change made to the information posted for type "N" properties listed on the SCO's Unclaimed Property search website. Type "N" properties are properties still in the possession of a business that will be sent to the SCO for safekeeping unless the owner contacts the business to recover the property or reactivates the account within the timeframe indicated in the Notice Details.

In the interest of protecting the privacy of potential property owners before their property escheats to our office, the SCO will no longer disclose specific amounts reported by holders until after publication of notice of the property in a newspaper of general circulation.
